Google Play

Download on the
App Store

HOW IT WORKS

1. Install FAAC control board+Simply Connect XWBL module
2. Download the Simply Connect app (phone for users, tablet recommended for installers)
3. Configure, control and monitor from anywhere, anytime*

KEY BENEFITS FOR INSTALLERS

- Remote configuration via app (no site visit needed)*
- Centralised dashboard showing the status and location of all assets
- Real-time fault alerts and reminders before the client calls
- Remote Transmitter Management – add, edit, or revoke without site visits

KEY BENEFITS FOR END USERS

- Remote control from smartphone or car infotainment
- Live status updates – open, closed, or fault alerts in real
- Time-based access rules for staff, guests or family
- Eco-friendly: no cards, no extra costs, just smarter control

FDS TRANSMITTERS (FOR PROS)

- Maximum security against cloning
- Double frequency (868MHz / 433MHz)
- Easy registration via app, matrix code, or receiver
- Fully remote management (no site visit required)
- Transceivers with built-in confirmation for reliable peace of mind

* Setup and safety-related settings must be performed on site
